

FEMA

Disclaimer: The purpose of this briefing is to provide a **Regional** weather threat assessment and is meant as a general overview. County/Parish decision makers should consult their local NWS forecast offices for the latest detailed, local weather information. To find your local NWS forecast office, go to www.weather.gov/srh and click on the "Weather Forecast Offices" tab and click on the map for your area.

FEMA Region 6 Weather Threat Briefing

Wednesday, March 21, 2018
Issued: 0800 CT

Day 1 Weather Threats: No significant weather impacts expected.

Moderate to major flooding continues on the Ouachita River and the MS River of LA/SE AR.

Minor river flooding continues in E TX/LA and E AR.

**National Weather Service
Southern Region Headquarters
Regional Operations Center
Fort Worth, TX**

**Prepared by: Kurt Van Speybroeck
817-978-1100 x 147**

Key Points

Today

- No significant weather impacts expected.

Thursday- Sunday

- Elevated to occasionally critical fire weather conditions are expected from E NM into the TX/OK Panhandles and eventually into W OK.

River Flood Status

- The Mississippi River has crested and remains in moderate flood stage below Arkansas City, AR. The gage at Baton Rouge, LA remains in major flood stage and water levels should gradually recede at all points along the river through the weekend.
- The Atchafalaya River has crested near Krotz Springs, LA. The Atchafalaya Bayou remains in minor flood stage.
- Due to the operation of the Bonnet Carre spillway, the gage at Reserve, LA remains in minor flood stage and should remain at this level until the spillway is closed.

FEMA Region 6 Threat Matrix

Mar 21, 2018 - Mar 25, 2018

DAY / THREAT	WED	THU	FRI	SAT	SUN
Strong/Severe Storms					
Heavy Rain / Flash Flooding					
Fire Weather		NM	E NM TX/OK Panhandles	E NM TX/OK Panhandles	E NM W TX/W OK
Winter					
River Flooding	LA/SE AR	LA			
	E TX/LA E AR	LA/AR			

	No Weather Threats Expected
	Very Common – Happens Often
	Common – Happens Frequently
	Uncommon – A Few Times a Year
	Rare – Once Every 1-5 Years
	Very Rare – Once Every 5-10 Years

For more details on the colors in the threat matrix refer to the last slide in this briefing.

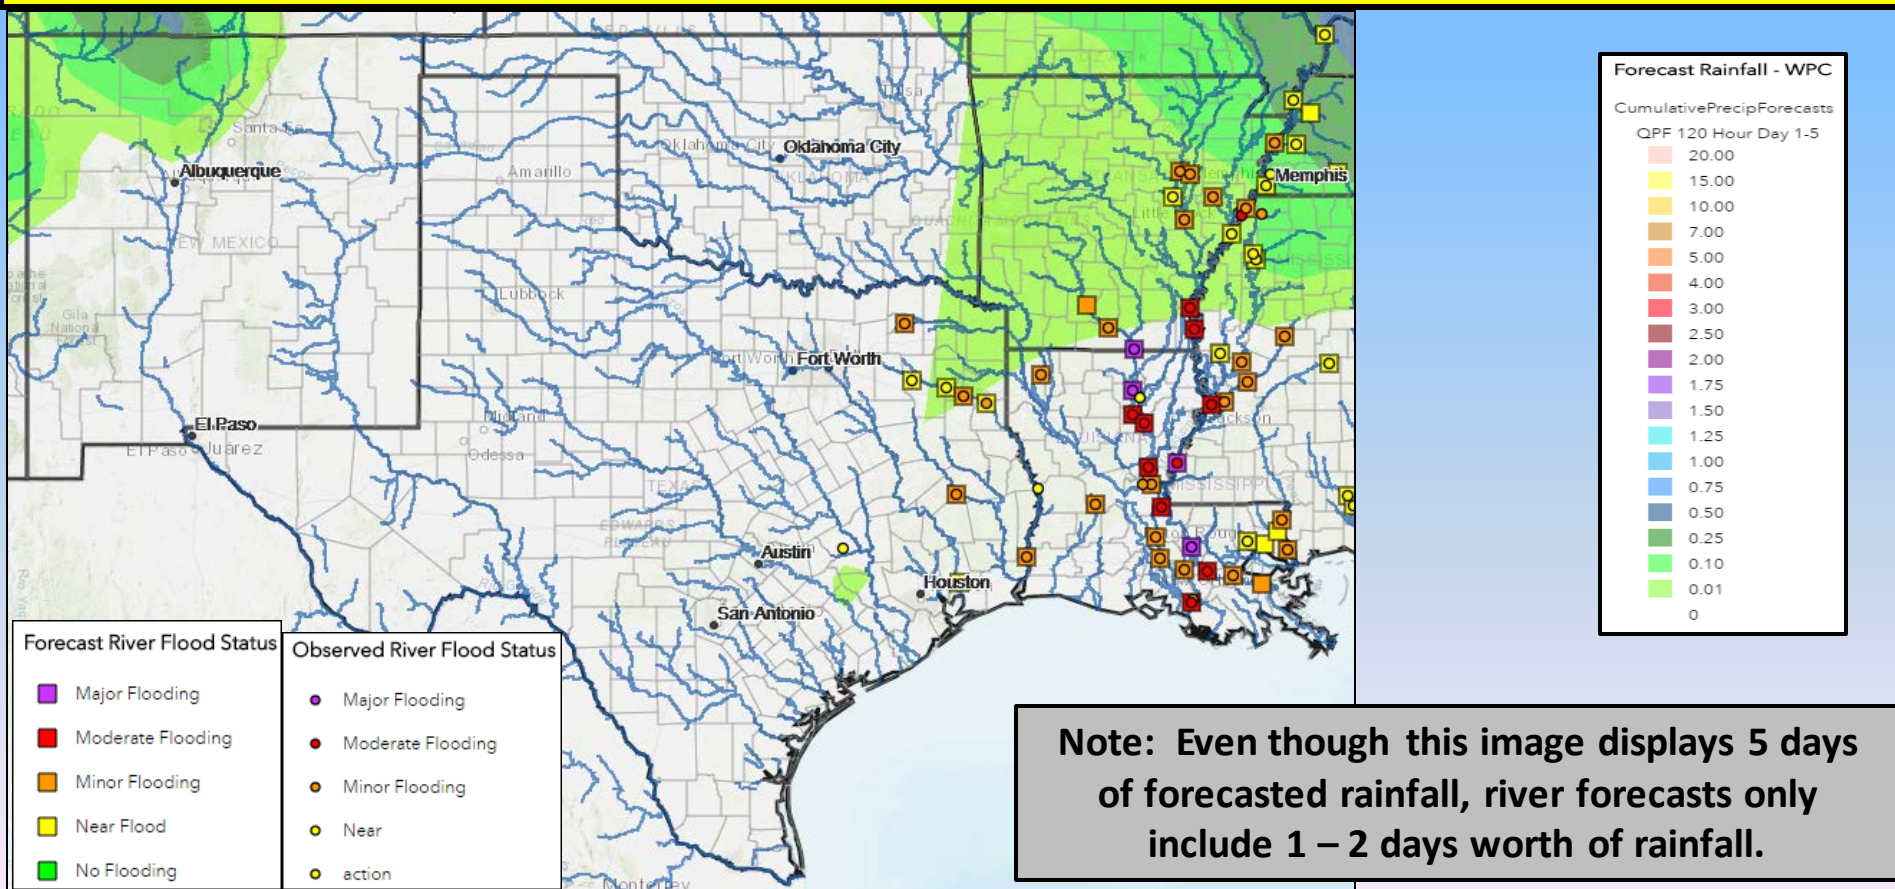

5-Day Precipitation Forecast & River Flood Status

Moderate to major flooding continues on the Ouachita River in AR and the MS River in LA:

- The Lower Mississippi River has crested at all locations in Louisiana. The water levels should gradually recede at Red River Landing, LA thru Donaldsonville, LA this week.
- Minor flooding continues on the Atchafalaya River.
- Due to the operations of the Bonnet Carre spillway the stage at Reserve, LA will continue to fluctuate around minor flood stage until the spillways is closed.

Minor flooding continues with rivers receding in E TX/LA and E AR.

The criteria for the color codes in our briefings is below, please provide any feedback to sr-srh.roc@noaa.gov.

Weather "Threat" Matrix			
Color	Definition	Criteria	Example(s)
Green	Very Common Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Little Inconvenience to Daily Routines	Severe: Marginal Risk from SPC Flooding: Minor flooding expected over localized areas Tropical: None Fire Weather: No Watches/Warnings, fuel moisture above 10% or green up active	<ul style="list-style-type: none"> Thunderstorms expected over LA this afternoon; a few may produce winds to knock down a few trees Something that happens almost every day in a particular season such as <u>seabreeze</u> storms in coastal TX
Yellow	Somewhat Common – Happens Frequently Safety: Rarely a Direct Threat to Life and Property Impact Potential: Typically Results in Some Inconvenience to Daily Life	Severe: Slight Risk from SPC Flooding: Nuisance flooded expected for a widespread area, or Minor flooding expected over isolated areas Tropical: A weak tropical wave expected to move towards or near any coastline Fire Weather: Red Flag Watches/Warnings and/or SPC outlines enhanced or critical fire outlook	<ul style="list-style-type: none"> 2-3 inches of rainfall expected over central AR today and tonight; some minor (brief) street flooding possible Scattered severe storms possible, one or two tornadoes expected, along with reports of strong winds/wind damage and ~1" hail
Orange	Uncommon – A Few Times a Year Safety: Often Threatening to Life and Property, Some Damage Unavoidable Impact Potential: Typically Results in Minor Disruption to Daily Life	Severe: Enhanced Risk from SPC Flooding: Minor flooding expected over a widespread area (including urban locations), or Moderate flooding expected over isolated areas Tropical: A Tropical Storm expected to move towards or near any coastline Fire: Critical fire outlook for more than 2 consecutive days, Warnings for 2 or more consecutive days, D3-D4 drought conditions	<ul style="list-style-type: none"> A snow/sleet mix is expected to move through or near the DFW area tomorrow morning; travel impacts likely Numerous severe storms possible, a few tornadoes possible along with several reports of wind damage along with damaging hail Some large fires reported, burn bans advertised, critical conditions expected
Red	Rare – Once every 1-5 Years Safety: Extensive Property Damage Likely, Life Saving Actions Also will be Needed Impact Potential: Will likely result in Large Disruption to Daily Life	Severe: Moderate Risk from SPC Flooding: Moderate flooding expected over a widespread area (including urban locations) Tropical: A Hurricane expected to move towards or near any coastline Fire: Large areas of critical conditions for 2 or more days, Warnings for 3 or more days, Severe to extreme drought	<ul style="list-style-type: none"> A Category 1 hurricane will be moving towards the NW Gulf in the next few days Widespread severe storms likely, strong tornadoes, widespread wind damage, and destructive hail Large fires ongoing throughout the area with critical fire weather conditions expected to continue
Purple	Very Rare – Once Every 5-10 Years Safety: Property Damage Unavoidable, Immediate Action to Save Life will be Needed Impact Potential: Typically Results in Long-Lived Widespread Major Disruption to Daily Life	Severe: High Risk from SPC Flooding: Major flooding expected over a widespread area (including urban locations) Tropical: A Major Hurricane (Cat3 or greater) expected to move towards or near any coastline Fire: Large area of critical conditions for 2 or more days, Warnings for 3 or more days, Long term (months) of severe to extreme drought	<ul style="list-style-type: none"> A Category 4 hurricane is headed towards the SE LA; major storm surge, flooding and damaging winds anticipated to begin tomorrow Widespread severe storms expected, tornado outbreak probable with long-lived, very widespread and particularly intense storms
